

SAFETY NOTICES

The Dragon SM-LM2596 (Dragon PSU Board) is a low voltage product, but it is still a POWER product.

As the end user, you are responsible for ensuring that the power adapter you use to power this board is safe and certified. Beyond this, your attention is drawn to the following:

THIS IS A HOMEBREW DEVICE.

IT HAS NOT BEEN SUBJECTED TO FORMALISED LAB TESTING.

IT HAS BEEN TESTED BY SEVERAL PRIVATE BETA TESTERS WITH NO ISSUES FOUND.

VINTAGE EQUIPMENT SHOULD NEVER BE LEFT UNATTENDED FOR SIGNIFICANT PERIODS OF TIME.

IN PARTICULAR, A NEW DEVICE SUCH AS THIS SHOULD BE CAREFULLY MONITORED BY THE END USER FOR SIGNS OF OVERHEATING ETC.

Please turn over

IT IS CRUCIAL THAT THE CORRECT FUSES ARE INSERTED INTO EACH FUSE HOLDER.

There are four fuses, and three different ratings of fuse. All are fast- or quick-blow types, and all are 20mm glass fuses.

Failure to fit the correct fuse could result in damaged equipment or a potential fire.

NEVER replace a blown fuse with a wire link.

Fuse ratings are also clearly marked on the board.
